# Products Specially Developed to for Cleanrooms

## What is a cleanroom?

A cleanroom is a controlled environment where airborne particulate matter such as dust, microbes, and aerosol particles are filtered out to provide a certain level of cleanliness. This control is achieved by air pressure and filters. Positive pressure keeps new particles from entering the clean area. The fewer the particles, the cleaner the room is. In order to prevent particles from getting into the environment, everything that enters the environment needs to be cleaned or covered.

## Cleanroom Classifications

Generally cleanrooms are classified by how many particles are found in a cubic foot of space. ISO defines nine different cleanroom classifications, ranging from ISO 1 to ISO 9. The most common cleanrooms fall somewhere in the ISO 5 to ISO 8 range. ISO 4 at any given time has 352 particles in a cubic foot of air and an ISO 8 cleanroom has 3.5 million. A typical room has 35 million particles circulating in the air.

### ISO 5 (Class 100) Cleanroom

Walls, floors, and ceilings should be non-porous/smooth and absolutely no linting fabric is permitted. Personnel would typically be wearing beard covers, face masks, shoe covers, gloves, hair nets, and coveralls. Gloves used in these environments should be removed from the cardboard box before they are brought in the cleanroom. Gowning is performed outside of the cleanroom. Polyester sealed-edge cleanroom wipes are commonly used in these environments. Certain poly-cellulose and polypropylene cleanroom wipes can also be used in some circumstances.

### ISO 6 (Class 1,000) Cleanroom

Walls, floors, and ceilings should be non-porous/smooth and absolutely no linting fabric is permitted. Personnel would typically be wearing beard covers, shoe covers, hair nets, and coveralls. Poly-cellulose, polypropylene, polyester, and cotton cleanroom wipes can be used in these environments.

### ISO 7 (Class 10,000) Cleanroom

Walls, floors, and ceilings should be non-porous/smooth and absolutely no linting fabric is permitted. Personnel would typically be wearing beard covers, hair nets or bouffant caps, and lab coats. Shoe covers might also be worn in some environments. Poly-cellulose, polypropylene, polyester, and cotton cleanroom wipes can be used in these environments.

### ISO 8 (Class 100,000) Cleanroom

Walls and floors should be non-porous/smooth, and no carpeting or fabric cushioned chairs should be used. Personnel would typically be wearing beard covers, hair nets or bouffant caps, and lab coats. Poly-cellulose, polypropylene, polyester, and cotton cleanroom wipes can be used in these environments.

Cleanroom Classifications*							
Class	FED STD 209E Equivalent	Maximum concentration limits (particles/m <sup>3</sup> of air for particles equal to and larger than the sizes listed below.					
ISO 1		10	2				
ISO 2		100	24	10	4		
ISO 3	1	1,000	237	102	35	8

ISO 9					35,200,000	8,320,000	293,000

Our best selling Controlled Environment Solutions are marked with this symbol.

## Types and Benefits of Wipe Materials

### Polyester

Polyester material yields exceptional durability and cleanliness. Edges can be thermally sealed to prevent loose ends and linting. Additional measures can be taken to further enhance cleanliness such as washing and processing / packaging the wipe in a cleanroom. Polyester wipes with sealed edges are commonly used in ISO 3-4 (Class 1-10) Cleanrooms, Polyester wipes without sealed edges can be used in ISO 5-6 (Class 100-1,000) Cleanrooms.

### Polyester/Cellulose Blends

These wipes can be engineered to meet unique requirements. Polyester/Cellulose blends are clean, absorbent, and an economic choice. Like polyester wipes, this material can be cleanroom processed to enhance cleanliness. They are common in ISO 5-8 (Class 100-100,000) Cleanrooms.

### Polypropylene

Polypropylene is soft, non-abrasive, and solvent resistant. It's suitable for wiping sensitive surfaces and components. Polypropylene can be cleanroom processed and washed to further enhance cleanliness. It can be presaturated with a variety of solvents, sterilized, and cut to any size. Common for ISO 6 (Class 1000), in some cases ISO 5 (Class 100) Cleanrooms.

Minimum Wipe Recommendations*

## Cleanroom Wipes

### Dry Cleanroom Wipes

- Our cleanroom wipes are made from the lowest-linting substrates including nonwoven poly-cellulose and polyester
- They are manufactured with materials that are free of bonding agents, adhesives or chemical additives
- With options for ISO Class 3 (Cleanroom Class 10) to ISO Class 7+ (Cleanroom Class 10,000), there is a wipe for virtually any cleanroom environment.

Additional sizes for Cleanroom Wipes are available

### Dry Non-Sterile Wipes

Item	Packaging	Size	Selling Unit
<b>NOVA-TECH® Wipes (ISO Class 5-6)</b>

## GRAB-EEZ® Cleanroom Wipes and Dispenser

- New stainless steel construction
- Redesigned cover makes loading wipes easier
- Optional plastic shield protects wipes inside
- Unique double C-fold wipes dispense one-at-a-time to eliminate contamination and waste
- ISO Class 5 (Class 100) Cleanroom Compatible
- Eliminates wasteful wipe usage and cross-contamination

Item	Description	Size	Selling Unit
GE-NT1-99	Nonwoven Poly/Cellulose Cleanroom Wipes - Made in USA	9" x 9"	150 wipes/bg - 12 bgs/cs
GE-DISP-SS	Cleanroom Wipe Dispenser, Stainless Steel – suitable for use in ISO Class 5 (Class 100) cleanrooms	-	1 each

## Pre-saturated Cleanroom Wipes

- Reduce the use of squirt bottles and dipping cans
- Reduce the amount of isopropyl alcohol used
- Use the exact percentage of IPA each application
- More even distribution of alcohol on the wipe and hence the wiping process
- Fewer VOCs (Volatile Organic Compounds)
- Safer to use, ship, and store than flammable liquids
- Convenience: No pouring, spraying, filtering, or diluting

**A 70% concentration of ethanol or isopropyl alcohol has been demonstrated to be the most effective.** Water acts as a catalyst and plays a key role in denaturing the proteins of vegetative cell membranes. The water content slows evaporation, therefore increasing surface contact time and enhancing effectiveness.

GAH-BP-28-WH	28"	White	100/bg - 10 bgs/cs
GAH-BP-28-BL	28"	Blue	100/bg - 10 bgs/cs

### Bee-Safe® Beard Covers

- Polypropylene nonwoven construction
- Soft and comfortable
- Non-linting
- Elastic band for secure fit and closure
- Lightweight

Item #	Size	Color	Selling Unit
GAH-BRD-WH	18"	White	100/bg - 10 bgs/cs

### Bee-Safe® Polypropylene Hood

- Provides complete head coverage
- Made of lightweight, low-linting and breathable polypropylene material
- Latex-free

Item #	Size	Color	Selling Unit
GAH-HOOD-WH	One Size	White	100/bg - 10 bgs/cs
GAH-HOOD-BL	One Size	Blue	100/bg - 10 bgs/cs

## Bee-Safe® Shoe Covers

### Polypropylene Shoe Cover Features

- Low-linting nonwoven fabric helps filter particulates for contamination control
- Non-skid base features a wide traction pattern for enhanced grip
- Elastic band gives secure yet comfortable fit around the shoes

### Super Sticky Polyethylene Coated Shoe Cover Features

- Super sticky base to reduce slipping and sliding
- Light liquid splash protection / water resistance
- Latex-free elastic edges to minimize allergic reactions; seamless

Item #	Size	Color	Selling Unit

## Cleanroom Paper

### Cleanroom Paper

- Paper Dimensions: 8.5" x 11"
- Brightness%: 88-92
- Used for writing, printing and photocopying in cleanroom environments
- Suitable for use in class 10 to Class 1000 (ISO class 4 to Class 6) cleanroom
- Pure image Premier Paper produced in Class 10 (ISO 4) cleanroom
- Excellent printability and heat toner adhesion
- Double sided web cleaned prior to sheeting
- High opacity and durability
- USP <797> Compliant

Item #	Description	Color	Selling Unit
PCIW1082C	22#, Latex Free	White	250 sheets/ream - 10 reams/cs
PCIW1096C	28#, Latex Free	White	250 sheets/ream - 10 reams/cs

## Cleanroom Floor Tacky Mats and Frames

### Tacky Traxx™ Mats

- Designed to remove particulate from foot and cart traffic upon entering a cleanroom
- Made of high quality incinerable polyethylene film with an adhesive surface featuring just the right amount of "tack"
- The highly engineered film has a durable and smooth surface that is not easily damaged by heavy foot traffic and cart wheels
- Each clean film adhesive mat features numbered corner tabs for easy tracking of remaining sheets
- Peel-off sheets eliminate the need for messy cleaning and make it easy to maintain a clean surface; all tacky sheets are numbered in reverse order
- Can be used for cleanroom and industrial purposes
- Tacky mat frames can be easily lifted to allow cleaning underneath
- Provides a designated area for your cleanroom tacky mats
- Enables tacky mat to be moved to various areas of the facility
- Lightweight and durable PVC
- Non-skid mesh backing

## Innovative SPHERGO SWIVEL® mop handle eases wrist strain. Ease of motion, better reach make life easier for cleaning professionals.

Repetitive stress injuries (RSIs) are a hazard of working as a professional cleaner, but it doesn't have to be this way. The Sphergo® line of ergonomic surface cleaning tools continues to improve working conditions for these vital members of the workforce with the new Sphergo Swivel® mopping tool, specially designed to reduce RSIs.

### SPHERGO SWIVEL® Mopping Tool

- The Sphergo Swivel® unique curved pole positions the user's body posture optimally to reduce repetitive strain injuries
- The rotating ball handle reduces unnecessary wrist motion while improving grip and control
- The curved pole paired with rotating ball on the handle allows for effortless smooth mopping "S" motion
- Sphergo Swivel® curved pole allows for farther reach underneath low-clearance obstructions like beds, chairs, and desks relative to a tradition straight mop while eliminating awkward bending
- Trapezoid frame design provides easier access into corners and along baseboards while making pad removal effortless
- The base's rounded edges help prevent any damage to sensitive areas such as wood trim or wooden furniture legs
- Replaceable hook and loop strips
- Lightweight aluminum frame

**Rotating ball handle** allows for improved grip and control.

**Curved pole** allows for farther reach under beds, chairs and more.

**Trapezoid frame design** provides easier access into corners.

Item #	Description	Selling Unit	Case Pack
2505-SWPOLE	Sphergo Swivel® White Aluminum Extension Pole	1 ea	12/cs
2505-SWBASE	Sphergo Swivel® White Aluminum Base for 18"-20" Pads	1 ea	12/cs
SPH-SWKT	Sphergo Swivel® Starter Kit Tools: (1) White Aluminum Extension Pole, (1) White Aluminum Base, Pads*: (12) Virtu-Clean® VCU2 pads, (12) Virtu-Clean® VCDCS pads	1 kit	1 kit/cs

\*During the transition period you may receive a kit that contains (12) Virtu-Clean® VCU pads, (12) Virtu-Clean® VCDC pads, (12) Virtu-Clean® VCDCS pads

The Sphergo Swivel® pole and base combination can be used with any 18"-20" disposable or reusable microfiber flat pad, but we recommend pairing Sphergo Swivel® with the Virtu-Clean® line of disposable cleaning pads for even more efficacious cleaning and less worker strain! These specially engineered pads are designed to reduce friction while maximizing cleaning results and coverage area.

# Charge once, even coverage, and a cleaner floor.

Not all cleaning pads are equal. Absorbency rates, release rates, coverage, and linting can vary greatly, significantly impacting the finished product. Virtu-Clean® Disposable Cleaning Pads are specially engineered for critical environments, giving you maximum coverage, cleaning, and convenience. Our disposable, single-use mop pads check all the right boxes – they hold more liquid, release that liquid at a controlled rate over a larger surface area, and reduce friction for more effort-free cleaning.

## Virtu-Clean® Disposable Cleaning Pads

### VCU2 | Virtu-Clean® Universal Disposable Cleaning Pad

- VCU2 offers the same efficacy as the original VCU, but now includes up to 90% recycled content!
- USP <797> Compliant for pharmacy sterile compounding and sterile preparations
- Eco friendly manufacturing with no chemical dyes used in the process
- Contains up to 90% post-consumer recycled content
- Single use application to reduce risk of cross contamination
- No quat binding
- Compatible with chlorine bleach, hydrogen peroxide, and common disinfectants up to 400 sq. ft. cleaning coverage
- Absorbs 9x its weight in liquid
- Superior absorbency and release provides consistent coverage and cleaning
- Embossed pattern reduces friction for less strain on workers
- Channels efficiently pick up and retain dirt in pad
- Bonded edges improve performance greatly, reducing linting for a cleaner clean
- Polyester backing produces less lint upon removal from base
- Bag in bag packaging for cleanroom application
- Perfect for foodservice and food processing operations, healthcare facilities, cleanrooms, controlled environments, surgical rooms, ICU areas, pharmacy applications, and other institutions

### VCDCS | Virtu-Clean® DCS Disposable Cleaning Pad w/Scrubber

Similar to the VCU2 pad, but with built in scrubbers for more aggressive cleaning and stain removal. With up to 48% recycled content, our VCDCS pads holds nearly 6x their weight in cleaning fluid, which translates into 240-300 sq. ft. of cleaning coverage with a single charge.

VCU2

VCDCS

Cleaning pads marked with this symbol are environmentally friendly with 48% - 90% post-consumer recycled content.

All pad options can be used with most flat mop bases; however, Hospeco Brands Group designed and recommends the pads be used with the new Sphergo Swivel®, for a more complete ergonomic cleaning solution.
