ABOUT CERTAINTY® WIPES

WE ENSURE PRODUCT EXCELLENCE AND THE BEST CUSTOMER EXPERIENCE WITH EVERY ITEM WE SELL.

As a leader in the away-from-home market, our cGMP manufacturing facility is fully integrated, which includes converting, blending and saturating wipes. We proudly source our raw materials locally within North America and produce a variety of Health Canada, EPA, and FDA registered wipe products.

WOODSTOCK, ONTARIO MANUFACTURING FACILITY

Our Chemists and Quality Control Department work closely with our talented team to ensure regulatory compliance and guarantee you receive the highest quality products.

SURFACES

CERTAINTY® RECOMMENDED APPLICATION AREAS

Certainty® surface wipes are non-corrosive, bleach free and safe for most hard, non-porous surfaces.

*Desktops • Tabletops • Counters • Chairs • Computer Keyboards • Telephones
Doorknobs/Handles • Railings • Light Switches • Washroom Fixtures
Exam Tables • Bed Frames • Wheel Chairs • Fitness Equipment
Exercise Mats • Diaper Changing Tables • Shopping Cart Handles
Cashier Stations • Touch Screens • Whiteboards*

THE BENEFITS OF WIPES VS SPRAYS

MORE EFFECTIVE

Our ready-to-use wipes have the correct concentration of ingredients for optimal effectiveness. Sprays may require mixing and measuring which leads to a higher risk of errors and a less effective solution.

OPTIMAL PERFORMANCE

Wipes provide targeted, even coverage compared to sprays. Wipes also leave the surface wet for the recommended dwell time while sprays tend to get wiped up too quickly before they have had a chance to fully kill the harmful germs.

MINIMAL TRAINING REQUIRED

Wipes use a simplified process of wiping the surface and leaving it to air dry. Minimal training is needed to achieve accurate results. Sprays require detailed training for proper dilution, how to use the equipment, PPE needed, and what to do with the cloths/equipment after use.

CONVENIENCE

Pre-prepared wipes require no mixing, measuring, or spilling. They are ready-to-go right out of the box

and have a one-step process for killing germs. Sprays may need to be mixed and use a two-step process of spraying and then wiping.

INFECTION PREVENTION & CONTROL

Single-use to prevent the risk of cross-contamination. Reusing a cloth with a spray product can re-contaminate multiple surfaces. Organic matter that is already on the cloth may also break down the active ingredients faster and reduce effectiveness.

IMPROVED SAFETY

Wipes apply the solution directly where it's needed without overspray. Exposure to chemicals in aerosolized disinfectants have been associated with respiratory issues and other health concerns if breathed in.

ENVIRONMENTAL IMPACT

Only one wipe is needed to cover a large area compared to a handful of paper towels used with a spray cleaner. Less waste means less cost and many of our wipes are recyclable or biodegradable.

ENVIRONMENTAL SUSTAINABILITY

OUR RESPONSIBILITY AND COMMITMENT

At Certainty®, we are committed to incorporating environmental sustainability into all aspects of our business in order to limit our impact on the world's natural resources.

Environmental responsibility is central to our overall operations from start to finish. We consider the environment every step of the way from the procurement of raw materials to how the product is most efficiently delivered to the customer.

ENVIRONMENTAL SUSTAINABILITY

Certainty® is committed to manufacturing products that effectively kill germs yet are gentle on the environment. We continually strive to reduce our ecological footprint using the following strategies and initiatives:

RESPONSIBLE SOURCING

We carefully choose suppliers that are local, eco-conscious, and can provide materials that minimize our environmental impact.

INNOVATIVE PRODUCTS & PACKAGING

Our focus is on developing product lines that include the use of recycled content, are biodegradable, recyclable, use less plastic, and are free of synthetic fragrances.

MINIMIZE WASTE & PLASTIC USE

Limiting waste is embedded into every aspect of our business from reducing packaging to replacing bottled water with dispensing systems and using recycled pallets.

REDUCE EMISSIONS

By sourcing local and reducing packaging, we are able to maximize our transportation efficiencies and reduce emissions both to and from our facility.

See page 10 to learn about our NEW Biodegradable Plus Disinfectant Wipes.

These biodegradable wipes are made from plant-based fibers, use less plastic and only one wipe is needed to cover a large area resulting in less waste.

SUSTAINABILITY OF REFILL ROLLS

It's important that we examine innovative, sustainable solutions that workplaces can easily implement that will make an immense, positive impact to the environment. Installing one of our refillable, high capacity wipe systems can dramatically reduce plastic consumption, limit waste and reduce carbon emissions compared to traditional wipe canisters. Our refill rolls range from 400 wipes per roll to 1200 wipes per roll.

LESS PACKAGING

Refill rolls use an average of

96% less plastic packaging

than other single-use canisters in the market.

A single refill roll can eliminate up to **15 plastic canisters** from potentially ending up in landfills.

LESS WASTE

Wipes dispensers ensure one wipe per pull, **limiting excessive use and waste.**

REDUCED EMISSIONS

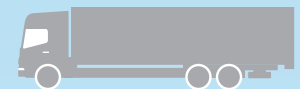

Raw Materials:

A truck can hold **18 times** more refill bags compared to canisters.

Finished Goods:

268% more wipes can fit per truck using large refill rolls compared to canisters.

1 truck of refill rolls = **3.7** trucks of canisters

Fewer trucks on the road mean less carbon emissions.

Made domestically in Canada resulting in shorter travel distances and less fuel consumption.

WIPES PRODUCTS

On Health Canada's List of Effective Disinfectants that
**KILL SARS-COV-2,
THE CAUSE OF
COVID-19**

CERTAINTY® MEDICAL TB DISINFECTANT WIPES (160 COUNT CANISTER) **DIN 02492229**

FEATURES & BENEFITS

- Broad spectrum disinfectant effective against Mycobacterium, bacteria, viruses, and fungi
- Kills Poliovirus, Mycobacterium Terrae, Staph, Salmonella, and more in ≤ 1 minute
- Fragrance free
- Registered with Health Canada
- Removes organic debris
- Non-corrosive formula
- Single use to prevent the risk of cross-contamination
