■ FIRST AID KITS

New ANSI/ISEA Z308.1-2021 First Aid Kits

In 2016 the standard was updated to this standard and has been the most comprehensive change to first aid kits in decades. The update reflects an assortment of supplies and quantities that are best suited to treat workplace injuries instead of designating kits by number of persons. New in 2021, the newest standard continues to build on maintaining and improving the Class A and Class B Standards.

Types of Kits

Class A: Designed for common workplace injuries such as major and minor wounds, minor burns and eye injuries.

Class B: Designed for high risk work zones such as construction, utilities, industrial and manufacturing.

Types of Containers

The kit containers are classified by portability, ability to be mounted, resistance to water, and corrosion and impact resistance.

Type I: Intended for use in stationary, indoor applications where kit contents have minimal potential for damage due to environmental factors and rough handling. These kits are not intended to be portable and should have a means for mounting in a fixed position. Some applications for Type I first aid kits are general indoor use, office use, or use in a manufacturing facility. First aid cabinets would generally fall into this type.

Type II: Intended for use in portable indoor applications where the potential damage due to environmental factors and rough handling is minimal. These kits should be equipped with a carrying handle. Some applications for Type II first aid kits are general indoor use, use in an office or manufacturing environment.

Type III: Intended for portable use in mobile indoor and/or outdoor settings where the potential for damage due environmental factors is not probable. Kits should have the means to be mounted and have a water resistant seal. Typical applications include general indoor use and sheltered outdoor use.

Type IV: Intended for portable use in mobile industries and/or outdoor applications where the potential for damage due to environmental factors and rough handling is significant. Typical applications include the transportation industry, utility industry, construction industry and the armed forces.

Choosing a Kit

When deciding the class and type of kit that may be most appropriate, employers should consider the risks that are present and the potential severity and likelihood of an incident. Based on the number of employees, physical layout of the facility and remoteness of emergency services, employers should also consider whether multiple first aid kits are needed. These considerations also come into play when determining if a kit needs to be supplemented with additional supplies. For a variety of operations, first aid kit minimum fill requirements may not include the employer's complete need for first aid supplies. The proper selection of these items should be based on the recommendation of the person competent in first aid and who is aware of all the hazards existing in the environment and the number of employees at the worksite.

Kits should be evaluated and inspected frequently to ensure the completeness and usability of all first aid supplies. Any supply beyond its marked expiration date should be discarded and replaced.

ProWorks® Class A Minimum Fill First Aid Kit

- This meets Z308.1-2021 minimum fill requirements for Class A Type I, II, III or IV
- Designed for common workplace injuries such as major and minor wounds, minor burns and eye injuries
- Color coded and unitized for ease of refills
- Made from heavy duty plastic to withstand tough work environments
- Portable or mountable
- Kit will continue to be compliant only when it is maintained with products that meet the standard

Kit Includes:	
(16) Adhesive Bandage, 1" x 3"	(1) Eye/Skin Wash, 1 fl oz
(1) Adhesive Tape, .5" x 2.5 yd (total)	(1) First Aid Guide
(10) Antibiotic Application, 1 g	(10) Hand Sanitizer, 1 g
(10) Antiseptic Towlettes, 5" x 7"	(2) Pair Medical Exam Gloves
(1) Breathing Barrier, 5.5" x 5.5"	(1) Roller Bandage, 2" x 6 yd
(1) Burn Dressing (gel soaked), 4" x 4"	(1) Scissors, 4"
(10) Burn Treatment, 1 g	(4) Sterile Pad, 3" x 3"
(1) Cold Pack, 5" x 7"	(2) Trauma Pad, 5" x 9"
(8) Eye Pads w/Tape	(3) Triangular Bandage, 40" x 40" x 56"
	(1) Foil Blanket, 52" x 84"

PROTECTION/FLUID CLEAN-UP KITS

Bloodborne Pathogens

Bloodborne pathogens are infectious microorganisms in human blood that can cause disease in humans. OSHA 1910.1030 details what employers must do to protect workers who are occupationally exposed to blood or other potentially infectious materials (OPIM). The standard protects workers who can reasonably be anticipated to come into contact with blood or OPIM as a result of doing their job duties. This standard lists appropriate PPE for this type of exposure, such as gloves, gowns, face shields, masks, and eye protection. [63 FR 33450, June 18, 1998]. For additional information please review OSHA regulation 1910.1030 and ANSI Z308.1-2021 to review the bloodborne pathogen standards required for your location.

First Step® Bleed Control Kit

- Designed to provide first responder bystander with the tools to stop a life-threatening blood loss
- Meets new ANSI Standard Z308.1-2021 when Bleed Control Kit is required

Kit Includes:

- | | |
|---|---|
| (1) SAM chest seal, 7" x 9" | (1) Scissors, - All Purpose EMT Style |
| (1) Survival Wrap/Foil Blanket, 52" x 84" | (1) Tourniquet, Windlass, 13.8" x 11.8" x 10" |
| (1) High Strength pressure Bandage, 4" | (1) Gloves, 2 pairs |
| (2) Hemostatic Pads, 4" x 4" | (4) Stretch Gauze- Non Sterile, 2" x 4.1 yds. |
| (1) Marker, Sharpie, 6" | (1) Safety Seal Flag |

FSPK2	Standard Infection Kit	1 ea

First Step® Blood Spill Clean-Up Kit

- For safe containment and clean-up of blood splatters/spills and to decontaminate exposed hard surfaces
- One time use kit to clean up blood/fluid spills

Each Sealed Kit Includes:

- (1) Pair of protective gloves
- (2) Disposable towels
- (1) Pre-moistened germicidal decontamination wipe
- (1) Packet of chlorinated granular fluid absorber
- (1) Plastic scoop
- (1) Pre-moistened antimicrobial disinfectant hand wipe
- (1) Red biohazard waste disposal bag

Item #	Description	Selling Unit
FSSK12	Single Usage Kits	12 kits/cs

EYEWASH STATIONS

Eye wash stations are used to flush the eyes of any airborne debris or caustic chemicals. The OSHA requirements for emergency eyewashes and showers, found in 29 CFR 1910.151(c), specify that "where the eyes or body of any person may be exposed to injurious corrosive materials, suitable facilities for quick drenching or flushing of the eyes and body shall be provided within the work area for immediate emergency use." ANSI's definition of "hazardous material" would include caustics, as well as additional substances and compounds that have the capability of producing adverse effects on the health and safety of humans. ANSI's standard also provides detail with respect to the location, installation, nature, and maintenance of eyewash and shower equipment.

Eye wash stations or showers must be readily accessible and require no more than 10 seconds to reach. The station must be easily identified with signage and path free of any obstructions. Please review the ANSI Z358.1 2014 standard for detailed information on what is required at your location.

ProWorks® 16 Gallon Eyewash Station

- Complete with steel wall bracket
- Quick one step activation that delivers a 15 minute flow as required by ANSI Z358.1-2014
- Wall mountable, no plumbing required

Item #	Description	Size	Selling Unit
2170FA	16 Gallon Capacity, 15 Minute Flow Eye Wash Station	-	1 ea
2174FA	Sterile Solution Refill for 16 Gallon Eye Wash Stations	8 oz	12/cs

ProWorks® Dual Bottle Eyewash Station

- Two sealed, sterile bottles of eyewash 16 oz included
- Durable station easily mounts to any wall
- Simple directions printed on station

Item #	Description	Size	Selling Unit
2172FA	Wall Mountable, Two 16 oz Bottles Station	-	1 ea
2173FA	Eye Wash Bottle Refills	16 oz	12/cs
