

## ■ DISPOSABLE MICROFIBER TOWEL

**Disposable Microfiber towels are convenient and easy to use. An excellent choice for heavy duty cleaning providing lint and streak free results. Safe to use on windows, smooth and coarse surfaces as your “go-to” dusting and cleaning cloth.**

The decision to use disposables often comes down to cost. Facilities that don't have their own on-site laundry service will have to pay a third party to wash and dry their microfiber, which can make disposables the more affordable option.

This towel is virtually indestructible. Can be used wet or dry w/ultimate tensile strength. Priced to serve as a disposable w/the strength to re-use multiple times. Will hold up to laundering too.

### Key Features

- Nonwoven microfiber towel, 100% Polyester
- Strength, absorbency and durability
- Non Quat binding material
- Improves cleaning efficiencies
- Durable 80 gsm is strong enough to reuse, but inexpensive enough to discard
- Performance of microfiber with a cost of a disposable
- Ideal for single use when infection control is a priority, or to avoid cross contamination

**Applicable Markets:** foodservice, hospitality, healthcare, janitorial, education
