Mopster® 2.0 Updates an Old Favorite *Bucketless mop system from Hospeco Brands Group improves ergonomics, efficiency*

CLEVELAND—June 11, 2025—Sometimes, the standard mop-and-bucket makes sense for floor care. Other times, bucketless mops – also known as spray mops – are a better choice. For those applications, there is [Mopster® 2.0](#) from [Hospeco Brands Group](#), a leader in thoughtful innovation in the away-from-home market.

An update of an old favorite, the Mopster® 2.0 product family has been reimagined — with the help of surveyed building service contractors — to enhance the floorcare process with ergonomics and efficiency in mind. The slim, four-inch profile slides under furniture while the pressure-activated on/off button improves control in dispensing cleaner. The new ribbed 36-ounce bottle is designed for easy extraction and insertion, and a low-level indicator window enables timely replenishment.

In addition to improvements in the efficiency of the mop, Mopster® 2.0 has also taken on new product design characteristics, including a black anodized-aluminum mop head that allows for a more aesthetic appearance for daytime cleaning. The matte black color masks discoloration, while the smooth, grooveless design helps ensure the mop holder dries clean, with no debris buildup.

The full suite of Mopster® 2.0 products includes the base handle, interchangeable 18- and 24-inch pad holders, and a bottle with a tethered cap. Mopster® 2.0 is compatible with the company's full range of hook-and-loop-backed pads. Pads can be selected based on application, from heavy-duty to light-duty; by surface type, such as hardwood, tile, or concrete; or by durability, ranging from reusable, launderable microfiber to single-use disposable synthetics.

Efficiency is built into everything about Mopster® 2.0. It's ready to use immediately; simply snap in the cleaning solution and you're good to go. No need to fill and empty buckets. Its light weight goes virtually anywhere, quickening the cleaning process and helping to reduce physical strain. Precise dosing of cleaning solution makes for less waste. Bucketless functionality eliminates spreading of dirty water, reducing risk of cross-contamination.

Mopster® 2.0 combines convenience, efficiency, and cleanliness with an ergonomic design that minimizes physical strain. It is ideal for residential, commercial, and industrial cleaning operations.
