HOSPECO®’s Complete No-Touch Restroom Fights Surface Germ Spread in Time of Global Outbreak

No-touch personal care dispensers, receptacles help protect against pathogens

CLEVELAND—March 24, 2020—Recent world events have underscored just how important it is to human health to avoid touching surfaces in public places. Germ survival rates on surfaces vary widely; however, even a few hours are too long and can promote the spread of pathogens among local populations.

Preventing these kinds of outbreaks was at the root of HOSPECO’s development of the complete no-touch restroom. Included in this revolutionary no-touch personal care assortment are Evogen® EV3 No-Touch Menstrual Care Dual Vendor (EVNT3), Evogen® EV4 Mini No-Touch Menstrual Care Dual Vendor (EVNT4), Evogen® No-Touch Combination Receptacle (EVNT-CWR), and Evogen® No-Touch Toilet Seat Cover Dispenser (EVNT1-W).

Together, they represent a giant leap forward in the health, safety, and experience of patrons. Hands-free sinks, soap dispensers, and hand dryers are already standard in many public restrooms. The addition of these new, state-of-the-art, hands-free products close the circle in reducing the spread of germs and illnesses and create a more upscale atmosphere that enhances guests’ overall comfort.

Evogen EV3 and EV4 No-Touch Menstrual Care Dual Vendors are the only touch-free dispensers of menstrual care products available. These no-touch tampon and pad dispensers go hand-in-hand with the Evogen® No-Touch Combination Receptacle, which provides easy, safe, and sanitary disposal of used menstrual care products. The unit dispenses single-use Scensibles® Personal Disposal Bags that discourage patrons from flushing used products or wastefully wrapping them in toilet paper. The bags have a pleasant, fresh fragrance and built-in antimicrobial agent that inhibit the growth of odor causing bacteria. With a simple wave of the hand, the receptacle opens, patrons deposit the personal disposal bag, then the unit closes automatically and seals in odors.

Completing the no-touch washroom is the Evogen No-Touch Toilet Seat Cover Dispenser—the first and only hands-free toilet seat cover system. Toilet seat covers themselves are, of course, on the frontline when it comes to creating a barrier between guests and surfaces.

The public is sure to demand additional safeguards against the spread of surface contamination in light of the extraordinary spate of closures and cancellations that have become the new normal across the

globe. When the world re-opens for business, establishments that take protection seriously will stand apart from the others.

A safer, more sanitary restroom is a win for everyone—customers, employees, and your brand. To learn more about HOSPECO’s full line of cleaning and protection products to serve the janitorial, industrial supply, foodservice, healthcare and hospitality markets, visit www.hospeco.com. Complete the no-touch restroom and protect your patrons.
